

The Plano, Texas Fire Department

Plano Fire Public Education Coordinator Lieutenant Peggy Harrell helped to develop a program with the goal of teaching adults life-saving lessons through smoke detector installation, fire extinguisher usage and emergency escape planning. The results of this program have already been proven when a woman who had participated in the training, was able to extinguish a fire in her home minimizing damage and preventing injuries.

This program was such a success that Lt. Harrell received the "National Home Safety Council's 2006 Safety Educator Hero Award." The Plano FD has purchased a Burn Pan designed and built by our company to further educate their citizens in fire extinguisher use.

"It's the first unit we've had at our department. Everybody loves it! It's an ideal unit for any extinguisher training course, it doesn't leave a mess and it is safe to use."
