

PASSFIRE™

BURN PAN TRAINING UNIT
BY HALCYON PRODUCTS, INC

The Halcyon Product's Passfire™ is a cost-effective, portable solution to contained, controlled burns for training purposes. It is used by fire departments, training firms, or by the person responsible for the fire extinguisher training.

-  Conduct safe fire extinguisher training, while maintaining a clean environment with the most inexpensive training unit on the market.
-  Firefighter designed and approved.
-  Helps businesses and organizations comply with OSHA 1910.157.

"It's the first unit we've had at our department. Everybody loves it! It's an ideal unit for any extinguisher training course, doesn't leave a mess and it is safe to use."

Peggy Harrell
National Home Safety Council's
2006 Safety Educator Hero Award
Plano, TX

PRODUCT FEATURES

-  The Passfire™ uses clean burning propane and is environmentally-friendly. The fire is contained within the pan and does not affect the surrounding training areas, eliminating mess and damage.
-  Deep stainless steel pan that contains the controlled fire while providing long product life.
-  The Passfire™ has sturdy supports for set up on any flat surface.
-  Contains quick disconnects for easy set up and tear down and provides additional security, controlling the supply of propane to the copper burn element.
-  A drain is provided in the bottom of the pan for easy clean up and disposal of water.

User should read the Passfire™ Instruction Manual and review the Material Safety Data Sheet provided with your propane tank.

- TESTIMONIALS -

"We use it every weekend with employees and the community.

It is very simple to operate, easy to clean up, and its portability allows us to take it anywhere."

Hamilton County Forensic Center
Chattanooga, TN

"The portability and the control you have with the dead man switch are the best features. Our training with the Passfire™ was so successful that we asked to teach a class in another area. We teach our students to always be prepared, and this unit is the best for accomplishing that."

Technology Center of DuPage
Addison, IL

"We really like it! It is one of the best units we have seen.

The Passfire™ is realistic, controllable, and with the dead man switch it is easy to stop the flow, making it very safe. We use it all over our University."

Ryan Dudley, Fire Inspector
Yale University, New Haven, CT
